Rotork Site Services – Service and Support	17

Rotork is the global market leader in valve automation and flow control. Our products and services are helping organisations around the world to improve efficiency, assure safety and protect the environment.

We strive always for technical excellence, innovation and the highest quality standards in everything we do. As a result, our people and products remain at the forefront of flow control technology.

Uncompromising reliability is a feature of our entire product range, from our flagship electric actuator range through to our pneumatic, hydraulic and electro-hydraulic actuators, as well as instruments, gearboxes and valve accessories.

Rotork is committed to providing first class support to each client throughout the whole life of their plant, from initial site surveys to installation, maintenance, audits and repair. From our network of national and international offices, our engineers work around the clock to maintain our position of trust.

Rotork. Keeping the world flowing.

Introduction

A range of 3/2 pilot operated poppet valves in stainless steel 316L for use on gases. Specifically designed for harsh environments, designed for actuator control.

Rotork Midlands' 1750 series is available in 1/4" to 3" NPT port sizes. 316L construction makes this valve range ideal for severe service / hazardous environments.

3/2 function for cylinder or actuator control incorporating:

- Low power consumption
- Low temperature options
- High flow rates
- Relevant industry approvals including SIL
- Sweet (natural) and sour gases as well as low pressure hydraulic, mineral or water
- Hazardous protection concepts

1750 Series Poppet Valve – Pilot operated

A range of 3/2 pilot operated poppet valves in stainless steel 316L for use on gases.

Features and Benefits

- Specifically designed for severe environments
- 316L stainless steel construction
- Designed for actuator control
- Large flow paths (up to 110 Cv)
- NACE capability option available

Media & Ambient Temperature Range

- 1/4" to 1 1/2" -20 to +180 °C (-4 to +356 °F)
- 2 & 3" -20 to + 80 °C (-4 to +176 °F)
- Low temperature version (all sizes up to and including 2") -50 to +80 °C (-58 to +176 °F)

Note: When product is ordered as /ATEX ambient temperature is limited to +40 °C (104 °F) Ex II2Gc T6.

Working Pressure

- Up to 12 bar (174 psi) maximum inlet pressure
- Minimum pilot pressure valve size dependent.

Ports NPT (BSP option available)

- 1/4" to 3" NPT
- Pilot ports 1/8" or 1/4" (valve size dependent)

Operating Media

- Gases – filtered lubricated or non lubricated air, inert gas, sweet (natural) and sour gases
- Liquids – low pressure hydraulic, mineral oil or water (please consult factory)

NOTE: To prevent freezing of the condensate within the product, the media dew point must be at least 18°F below the lowest ambient temperature the product will be exposed to.

Construction Materials

- Body & trim: 316L stainless steel
- Springs: 316 stainless steel
- Seals: 1/4" to 1/2" fluoroelastomer (standard option)
3/4" to 3" nitrile (standard option)
1/4" to 3" EPDM¹ (low temperature version)

¹ The use of lubrication upstream of the product is not recommended for low temperature applications.

Drawings and 3D models for all valves and solenoid options available on request

Size	Mass (kg)	Max. Flow L/Min	Max. Flow SCFM	Min. Pilot Pressure	Cv
1/4"	0.65	1216	43	4.0 bar	1.2
3/8"	0.9	1809	64	4.0 bar	1.8

² Low temperature option not available in 3"

³ ATEX Directive 2014/34/EU (Non-electrical ATEX)

1750 Series Poppet Valve – 1/4" to 1/2" Pilot solenoid operated

A range of 3/2 pilot solenoid operated poppet valves in stainless steel 316L for use on gases.

K-TYPE solenoid shown - see solenoid specification chart

Features and Benefits

- Specifically designed for severe environments
- 316L stainless steel construction
- Designed for actuator control
- Large flow paths (up to 110 Cv)
- NACE capability option available

Media & Ambient Temperature Range

Please refer to solenoid selection chart on page 13.

Working Pressure

- Up to 12 bar (174 psi) maximum inlet pressure
- Minimum pilot pressure valve size dependent

Ports NPT (BSP option available)

- 1/4" to 1/2" NPT
- Pilot ports 1/8"

Operating Media

- Gases – filtered lubricated or non-lubricated air, inert gas, sweet (natural) and sour gases - NACE
- Liquids – low pressure hydraulic, mineral oil or water (please consult factory)

NOTE: To prevent freezing of the condensate within the product, the media dew point must be at least 18 °F below the lowest ambient temperature the product will be exposed to.

Construction Materials

- Body & trim: 316L stainless steel
- Springs: 316 stainless steel
- Seals: 1/4" to 1/2" fluoroelastomer EPDM¹ (low temperature version)
- 1/4", 3/8" and 1/2" pilot solenoid poppet valves have internal feed to solenoid, therefore can only be used 3/2 normally closed, if normally open or separate pilot supply is required please consult factory

¹ The use of lubrication upstream of the product is not recommended for low temperature applications.

Drawings and 3D models for all valves and solenoid options available on request

Size	Mass (kg)	Max.Flow L/Min	Max.Flow SCFM	Operating Pressure	Cv

¹ For solenoid details see page 13
² "T" type solenoid only available in 28 VDC (Y)
³ When selecting Type "5" (NC, NO) the R/H Operator must be "4" - Solenoid Separate Supply
⁴ ATEX Directive 2014/34/EU (Non-electrical ATEX)
 NOTE: The combination of the valve and the coil will determine maximum ambient i.e. always the lower of the two.

1750 Series Poppet Valve – ¾" to 3" Pilot solenoid operated

A range of 3/2 pilot solenoid operated poppet valves in stainless steel for use on gases.

K-TYPE solenoid shown - see solenoid specification chart

Features and Benefits

- Specifically designed for severe environments
- 316L stainless steel construction
- Designed for actuator control
- Large flow paths (up to 110 Cv)
- NACE capability option available

Media & Ambient Temperature Range

Please refer to solenoid selection chart on page 13.

Working Pressure

- Up to 12 bar (174 psi) maximum inlet pressure
- Minimum pilot pressure via solenoid supply port (valve size dependent - see chart)

Ports NPT (BSP option available)

- ¾" to 3" NPT
- Pilot Ports 1/8" or 1/4" (valve size dependent)

Operating Media

- Gases – filtered lubricated or non-lubricated air, inert gas, sweet (natural) and sour gases - NACE
- Liquids – low pressure hydraulic, mineral oil or water (please consult factory)

NOTE: To prevent freezing of the condensate within the product, the media dew point must be at least 18 °F below the lowest ambient temperature the product will be exposed to.

Construction Materials

- Body and trim: 316L stainless steel
- Springs: 316 stainless steel
- Seals: ¾" to 3" Nitrile EPDM¹ (low temperature version)

¹ The use of lubrication upstream of the product is not recommended for low temperature applications.

1750 Series Poppet Valve – Plunger or roller lever operated

A range of 3/2 mechanically operated poppet valves for cylinder position detection in stainless steel 316L for use on gases.

Features and Benefits

- Specifically designed for severe environments
- 316L stainless steel construction
- Mechanically operated
- Limit switch for end of actuator stroke detection
- NACE capability option available

Media & Ambient Temperature Range

- -20 to + 80 °C (-4 to +176 °F)

Note: When product is ordered as /ATEX ambient temperature is limited to +40 °C (104 °F) Ex II2Gc T6.

Working Pressure

- Up to 12 bar (145 psi) maximum inlet pressure

Maximum Flow

- 402 l/min (14.2 SCFM)
(at 6.0 bar with 1.0 bar differential)

Ports NPT (BSP option available)

- 1/8" NPT

Operating Media

- Gases – filtered lubricated or non-lubricated air, inert gas, sweet (natural) and sour gases
- Liquids – low pressure hydraulic, mineral oil or water (please consult factory)

NOTE: To prevent freezing of the condensate within the product, the media dew point must be at least 18 °F below the lowest ambient temperature the product will be exposed to.

Construction Materials

- Body and trim: 316L stainless steel
- Springs: 316 stainless steel
- Seals: Nitrile
